

Pat Apply

Software Engineer · Test Persona

pat.apply@example.com | +1-555-0100 | Seattle, WA

linkedin.com/in/applyslave-test | github.com/applyslave-test

SUMMARY

Fictional candidate used by the ApplySlave test suite. Contact details point to RFC-reserved domains and phone exchanges so automated submissions can never reach a real person.

EXPERIENCE

Software Engineer – ApplySlave Test Co.

2024-06 - Present

- Built fixture data for end-to-end test runs of the apply flow.
- Implemented form-fill regression tests across Greenhouse, Lever, Ashby, and Workable boards.
- Documented the dry-run protocol so future test runs do not submit anything to real hiring systems.

Software Engineer – Example Labs

2022-08 - 2024-05

- Owned a Python + FastAPI service for processing resume PDFs.
- Designed a regression harness for headless-browser flows.
- Wrote tooling that reduced flaky-test rate from 12% to 3%.

Software Engineer Intern – Sandbox Inc.

2021-06 - 2021-08

- Prototyped a CLI for replaying mock HTTP traffic.
- Added telemetry hooks for the company's internal CI farm.

EDUCATION

B.S. Computer Science – University of Washington

2018-09 - 2022-06

SKILLS

Python, TypeScript, React, FastAPI, Playwright, SQLite, Docker, Git, Pytest, REST APIs
